Direct traffic: traffic to a domain via URLs entered in a browser’s search bar, saved bookmarks, or links from outside a browser.

Search traffic: traffic to a domain directly from a search engine such as Google.

Once we developed and began executing a customized content strategy, DearSystems went from having no notable online presence to having **a constant stream of high-quality content.**

With SEO blogs, email funnels, case studies, social media posts, and optimized landing pages, DearSystems not only experienced **a raise in traffic and brand awareness,** but also reaped the benefits of engaging current and former customers.

Our experience and thorough research on their target, industry and competitors, led to a deep understanding that reflected on **first-page rankings on Google, and a flow of new leads.**
